

Antenna Gain Contours for Beams UU4A, UU4B, UD4A, UD4B, UD4C, UD4D, UD4E, UD4F

Contours are centered on the surface of the Earth with the peak antenna gain pointed at nadir to a latitude and longitude within the proposed service area.

Contours are at -2 dB, -4 dB, -6 dB, -8 dB, -10 dB, -15 dB and -20 dB relative to beam peak.

Axes are plotted in azimuth (east-west) and elevation (north-south).
